HQ: 150/41 Nguyen Cu Trinh St., Dist. 1, HCMC | Hub: 51 Le Van Loc, Vung Tau City

## PRODUCT HERITAGE & CREDIBILITY

Plastigauge® is a globally recognized precision clearance measurement solution, manufactured under stringent UK standards. It is widely used by leading engineering organizations including Rolls-Royce, BMW, and high-performance motorsport applications such as Formula 1. Beyond automotive excellence, the product is highly trusted for high-accuracy diagnostics in heavy industrial assembly, large-scale turbine systems, centrifugal pumps, and critical rotating equipment.

For decades, professional engineers have relied on Plastigauge to provide rapid, accurate, and non-destructive measurements of hidden clearances. The specialized extruded plastic thread is designed to crush accurately between two mating surfaces, allowing technicians to verify clearances with a high degree of confidence. This ensures optimal mechanical performance, minimizes the risk of catastrophic failure, and significantly extends the operational lifecycle of industrial machinery.

## TECHNICAL SPECIFICATIONS

MODEL	RANGE (MM)	RANGE (INCH)	PACKAGING
PL-X	0.018 - 0.045	0.0007 - 0.0018	Box 100 strips (75mm)
PL-A	0.025 - 0.175	0.001 - 0.007	Box 100 strips (100mm)
PL-B	0.100 - 0.250	0.004 - 0.010	Box 100 strips (100mm)
PL-C	0.175 - 0.500	0.007 - 0.020	Box 100 strips (100mm)
PL-D	0.500 - 1.000	0.020 - 0.040	Box 30 strips (100mm)
PL-E	0.750 - 1.750	0.030 - 0.070	Box 25 strips (100mm)
PL-F	1.750 - 3.000	0.070 - 0.120	Box 20 strips (100mm)

\* Traceability Notice: All authentic Plastigauge boxes distributed by Fast Group feature a Holographic Silver Sticker. This ensures traceability and quality control via a unique Serial Number and Lot/Batch code on every individual package.

## LOGISTICS & DISTRIBUTION

All products are officially imported directly from the United Kingdom, ensuring full compliance with international quality standards. Distribution within the region is exclusively handled by Fast Group Company Limited. We provide fast and secure delivery services, a fully traceable supply chain, and highly reliable commercial documentation to meet the rigorous procurement requirements of major corporations and state-owned enterprises in the energy sector.

## QUALITY ASSURANCE & COMPLIANCE

### Documentation & Support

Shipments include Commercial Invoice, Packing List, and Distributor's Statement of Origin. Expert consultancy is available from our dedicated engineering team.

### Reliability & Applications

Complies with international precision standards. Suited for inspecting bearings, camshaft clearances, and flange faces in marine engines and gas compressors.
